CLEO MK2

The Cleo goes digital. Recognising the requirement for affordable DSP, OHM are proud to announce the fully functioned CLEO Mk2 2-6 Loudspeaker System Controller. The CLEO Mk2 is a 48k 2 input 6 output fully configurable digital unit for full system control. Providing crossover facilities offering up to 48dB/octave slopes, up to six outputs can be derived from either of the two inputs or a sum of both. The CLEO will store up to 60 user custom programs. It comes preloaded with system parameters for limited OHM loudspeaker systems and features security lock out modes for protecting and hiding program settings. Intuitive front panel controls for channel muting, programming and level information, with the option of interfacing the unit via a PC make this a truly flexible audio system solution.
