CRED MK2

An essential and comprehensive arsenal of digital tools for the system designer. This totally new loudspeaker management system is an intuitive aid for today's sound engineer. Requiring only 1U of rack space, CRED equips the system designer with full control over system parameters. Whilst in the digital domain, the user can control delay parameters, gain structures and fully assign multiple parametric E.Q.'s to both it's inputs and four or six outputs, dependant on model. The CRED MK2 comes pre-loaded with pre-filtering parameters for all the Planet Suite, BR and TRS enclosures allowing plug and play operation of OHM's latest loudspeaker systems.
